Protocol Overview

This protocol combines supplements that are formulated for both men and women to naturally address erectile and sexual dysfunctions by helping to increase circulation, stamina, and desire, support the kidney as there can be no “sexual virility” without having a healthy kidney function, and nutritional supporting supplements to provide essential nutrients to enhance health and well-being.

This Wellness Protocol brings together the traditional herbs and minerals of our individual formulations to replenish vitality and increase nutritional value at a cellular level through a simplified, consistent and balanced supplementation program.

Virility targets the cause of E.D. and provides immediate sexual performance benefits. Since Virility naturally addresses the underlying causes of sexual dysfunction, the decision to utilize this product is simple. Virility has been formulated to benefit both men and women. Women suffer from similar problems such as poor circulation to sexual organs and loss of libido.

- **Vitamins** are chemical structures needed for the body to process nutrients.

Vitamin E – Vitamin E is a potent antioxidant that helps protect cells from “free radical” damage. Antioxidants are extremely important in the prevention of heart disease, cancer and diabetes. The most natural form of Vitamin E available is d-Alpha Tocopherol (not to be confused with dl-Alpha). Universal Formulas Vitamin E is a plant-sourced blend of Tocopherols including d-Alpha, d-Beta, d-Delta, and d-Gamma. This unique, all natural blend makes this product one of the most complete and natural forms of Vitamin E available.
